

TAKE THE AQUARIUM SELFIE CHALLENGE:

See how many of our residents you can find and get to pose for a picture

- A colorless amphibian
- A fish with a red belly and an undeserved reputation
- A fish older than dinosaurs - it can "walk" in low water
- A reptile that might snap at you back
- A fish that is the only cichlid native to the US
- A fish that will shock you
- An air breathing fish who can live out of water burrowed in mud
- A "giant" from South East Asia
- A fish who lets shrimp clean its teeth
- A fish who, when they get old, develop a dual set of teeth
- A "crazy" fish who travels in pairs and could use some oil
- A fish who has plates instead of scales
- A reptile whose tongue can be longer than its body
- A fish who is a real "stinger"
